

Year 5 - Spring 2 Ancient Egypt

Collaboration

We will work together to see how the ancient Egypt civilisation influences our modern world.

Write stories to scare. Use features identified in other stories, written to entertain.

Convert fractions, decimals and percentages from one form to another.

Creativity

We will look at the artwork of Victoria Villasana.

We will improve our mastery in stitching, with a focus on pattern, line and colour. We will use patterns and lines to embroider on to photograph of a person and make collaborative portrait of a famous face.

WoW factor: Trip to British Museum

Critical Thinking

Investigate and develop an understanding of different types of materials. We will plan and carry out experiments to see how materials go through reversible and irreversible changes. We will deepen our understanding of different types of variables.

We will use our knowledge of fractions, decimals and percentages to solve problems.

The World and Me

We will learn about a culture that is different from own one and learn about the history of that culture and how it influences our world today.

Strengthen our own sense of identity while raising awareness of the influences around us. We will explore how choices are made, what influences those choices and how to take greater responsibility for our own safety.
